

ADDING WORKSHOP IN CRM

INITIATING CREATION

Referencing data in Workshop Tracker, gather the data to create the workshop details.

WORKSHOP ID

To assign a workshop ID, continue the ID of the preceding or latest workshop created.

01

WINNING DEALS

Once a deal is won, the potential client added to workshop tracker.

02

CREATION

In CRM, go to Workshop and Create Workshop. Always choose the correct Workshop Layout (On Premise or Virtual)

03

04

COMPLETION

It is not necessary to add/input all details completely. Other important data will become available once the workshop progresses.

ADDING WORKSHOP IN CRM CYCLE

Access the workshop using its workshop ID or check it through Workshop Master Report.

The workshop tracker is the initial reference for all upcoming and previous workshops.

After creating the workshop, timely update the details as soon they are available during and after the workshop.

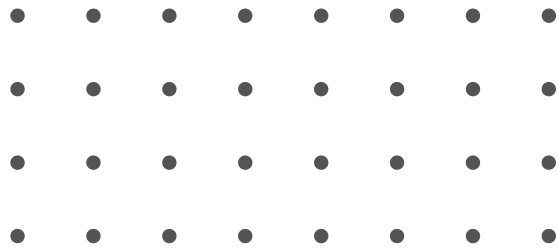

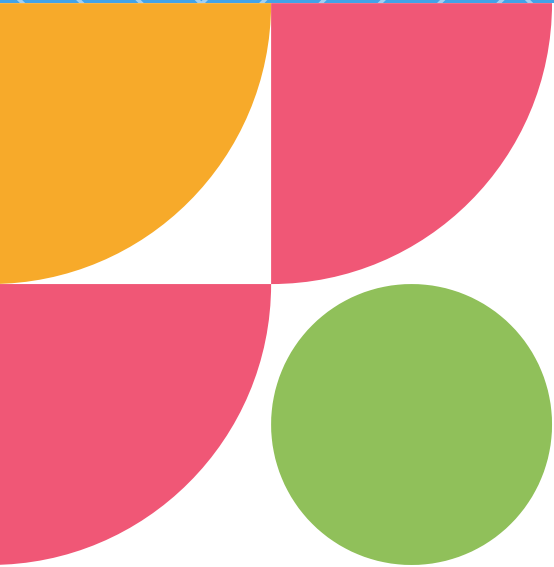

Workshop tab is the initial tab in CRM to start creating/adding new workshop

When creating the workshop, make sure to choose the accurate layout for the workshop venue.

The workshop ID is assigned uniquely per workshop. The ID must follow the sequence of the latest workshop created. Add the ID in the workshop tracker for reference.

***On-premise** - Onsite

***Virtual** - Zoom

THANK
YOU
