

HOW TO CREATE

PRE-WORKSHOP SURVEY & REPORT

WORKFLOW IN 4 EASY STEPS

01. | Create admin link for prework survey where data report will be extracted prior the start date.

02. | Use the official template report to create the prework survey.

03. | From the raw data, copy the results and paste it in the Raw Tab of the report template.

04. | After transferring the raw files, run the data and upload report in designated SP folder. Responses and Tally tabs are formulated.

ADMIN & LEARNERS' LINK < EXTRACTION

Duplicate template to Admin Link

Create the admin link by duplicating the template of the link.
After the pre-work message is sent, start collecting the data to prepare the report before the workshop commences. Normally, the survey will run a week prior the start date.

Update admin link to workshop details

Ensure that all the details are properly updated (Workshop Name, Date and the Type of Workshop).
Copy the shortened URL for Learners through the Collect Responses tab.
Admin link in collaborate tab should be People In Watershed format before copying the link.

Associate links in CRM & Detail Sheet

Paste all the links in CRM and add them in the detail sheet for reference.
Links are under the Pre-work Assignments field in CRM.
Hyperlink them when adding in the detail sheet.

Extract Responses

Access admin link through CRM or detail sheet and start the extraction of the responses.
Through View Responses, click on Open Results and Download Copy.

Click the images for the sample data

PREPARE PRE-WORK REPORT

- From the copied template of the report, update the filename and other details to the specified workshop.
- Clear the RAW tab as it will be the source of the data for the report.

- Leave both Responses and Tally tabs as is. The report will auto run after updating the Raw tab.

UPLOADING RAW DATA

- After extracting the survey responses, copy everything from the results and transfer to the Raw tab - like the one below.

CONFIDENTIAL DETAILS

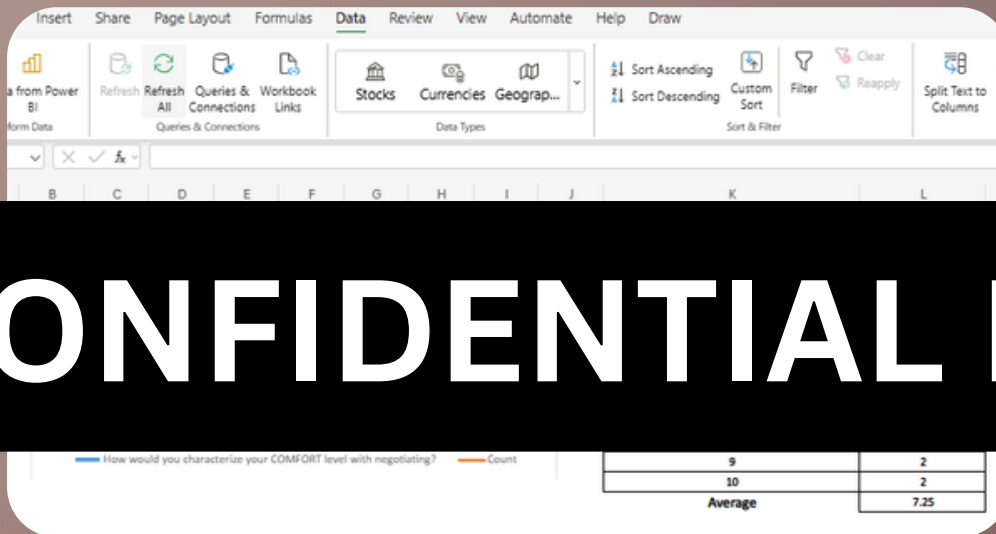

CONFIDENTIAL DETAILS

RUNNING AND SAVING REPORT

- Once raw data are uploaded, go to Tally tab and tick on Refresh button to run the report.

CONFIDENTIAL DETAILS

- The updated report must be saved in the specified SP folder of the facilitator. Complete report at least 5 days prior the workshop commences.
