

HOW TO CREATE TKI REPORT

PROCESS FLOW IN CREATING TKI REPORT

1 - Accessing Data

Go to and login in Elevate. Use the Admin Account. Look for Projects + Reports tab.

2 - Data Extraction

Once you are in the Projects + Reports tab, scroll down to the specific workshop TKI project. On first extraction, you Download All Reports. Then for update, you can just download the New Reports for additional responses.

3 - Data Review

Access the downloaded data from your local folder, open each PDF report to gather the responses. Review and collect the accurate responses per learner.

4 - Data Transfer

Using the TKI report template, add the reviewed data in Pre-work tab. The TKI chart will update automatically. Do not forget to update the Client name for the report prior saving and sharing.

5 - Final Output

Save the report in the specific SP folder and upload all the PDF reports/responses per learner. As the workshop date approaches, ensure to gather all responses and add to the final output.

DATA REVIEW

In getting the responses to input in the report, you only have to get the learner's Top and Last choice of negotiation mode.

MOST -
Compromising

Based on the learner's response, his top negotiation mode is Compromising.

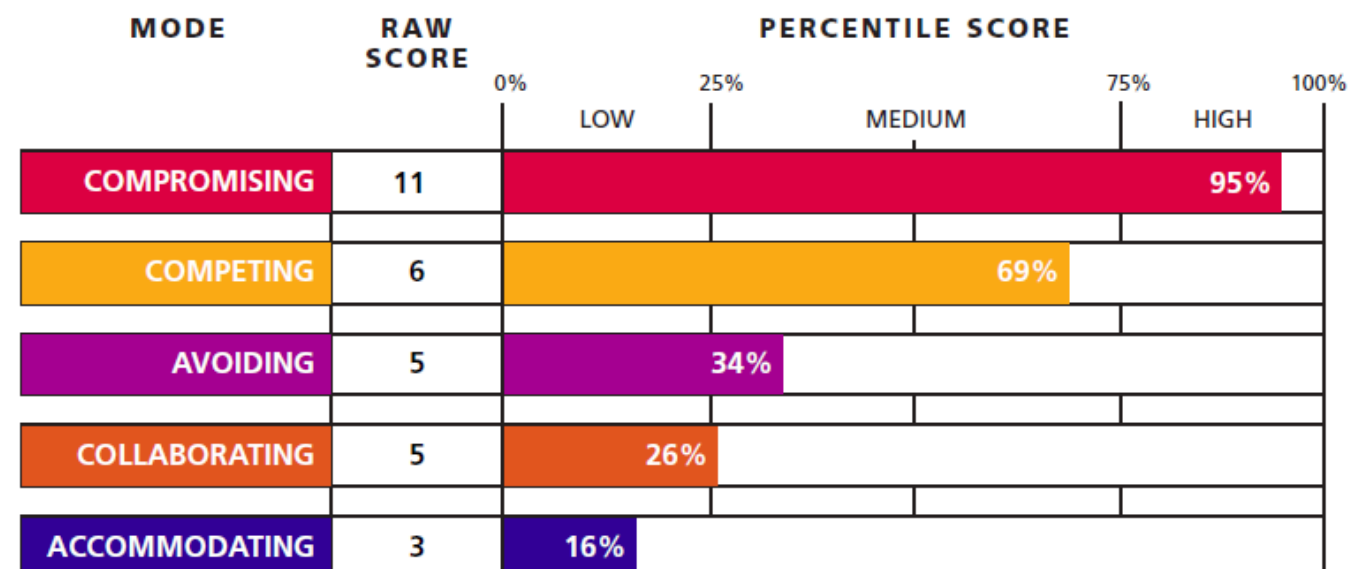

LEAST -
Accommodating

Learner scored Accommodating as his last mode of negotiation.

Your TKI Profile

Your profile of TKI scores, shown below, indicates the repertoire of conflict-handling modes you use in the kinds of conflicts you face. Your scores are arranged in descending order by percentile, with your highest score indicating your most frequently used conflict mode.

DATA TRANSFER

In transferring the responses to the report file, after updating the client name and adding the learner's complete name, add both Top and Last negotiation mode choices in the appropriate columns.

MOST -
Compromising

Under **Column G (Most)**, choose on the drop down list Compromising as the learner's top choice.

LEAST -
Accommodating

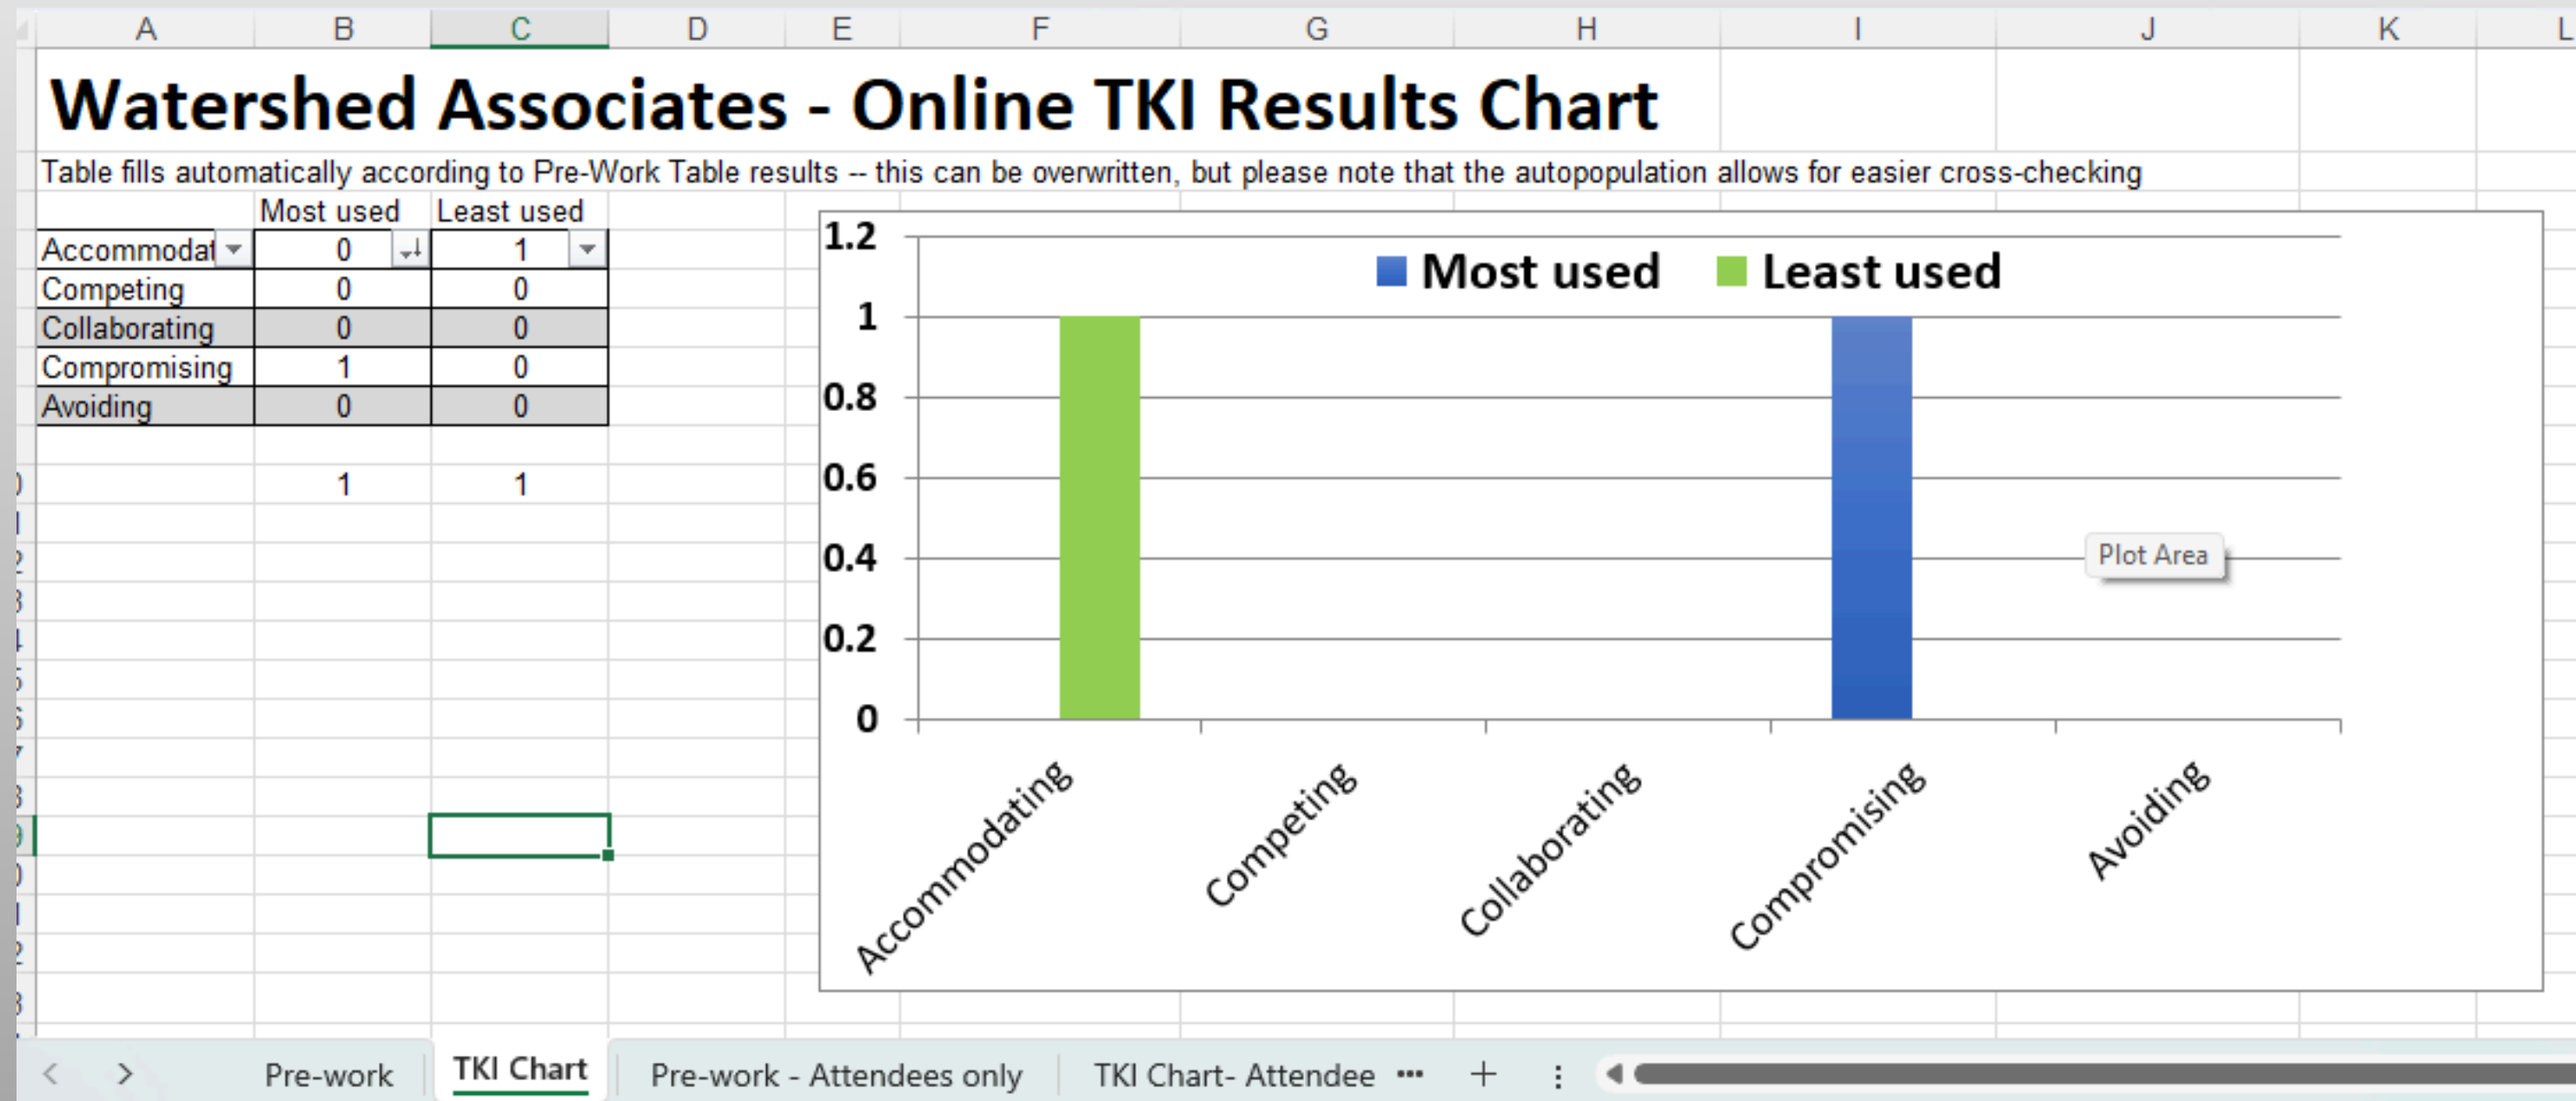

Under **Column I (Least)**, choose on the drop down list Accommodating as the learner's last choice.

FINAL OUTPUT

The TKI Chart will automatically read the data inputted in the Pre-work tab. After finalizing the report, ensure to upload it in the specified SP folder of the workshop facilitator along with the PDF responses of each learner.
